

2020 Porsche Taycan

Charge Door Removal

In the event of the charge door failing to open, the cover panel can be removed manually.

In the front trunk area, locate the tool kit on the driver side of the vehicle.

Charge door removal tool.

Insert the removal tool in the center of the rear side of the charge door.

With moderate force, pull straight out on removal tool with one hand, using your other hand to catch the door as it releases from the vehicle.

Once removed: Place the charge door inside the vehicle to prevent damage to the finished surface.
