Aviator

Unlatching the Driver Door with the Key Blade

If your vehicle has no power and the backup power system is turned off, you can manually unlatch the driver door using a key in the position shown.

1. Remove the key blade from the transmitter.
2. Insert the key blade into the lock cylinder.
3. Turn the key clockwise to unlatch the driver door.

Note: All other doors remain locked.

Continental2

Unlocking the Driver Door with the Key Blade

If your vehicle has no power and the backup power system disables, you can manually unlock the driver door using a key in the position shown.

E222424

1. Remove the key blade from the transmitter.
2. Insert the key blade into the lock cylinder.
3. Turn the key clockwise to unlock the driver door.

Note: All other doors remain locked.

Corsair 2020+

Locking and Unlocking the Doors with the Key Blade

If the central locking function does not operate, lock the doors using the key blade in the door handle lock cylinder.

Unlocking with the Key Blade

Insert the key blade into the driver door handle lock cylinder, turn the key down toward the rear of your vehicle to unlock.

MKC 2015-19

E176224

Slide the release on the back of the remote control and pivot the cover off to access the key blade.

At the Front Doors

Pull a front exterior door handle to unlock and open the door. The unlock sensor is on the back of the handle. Make sure not to touch the lock sensor area on the front of the handle.

MKX

2011-2015

The IA key also contains a removable mechanical key blade that can be used to unlock the driver door. To release the mechanical key blade, slide the release on the back of the transmitter and pull the blade out.

Your IA keys are programmed to your vehicle. You cannot enter or start your vehicle with an unprogrammed key. If you lose one or both of your IA keys, replacements are available from your authorized dealer. For more information on programming replacement IA keys, refer to the *SecuriLock® passive anti-theft system* section in this chapter.
