

# 2021 Alfa Romeo Giulia

## Remote Battery Connection Posts

Your vehicle is equipped with remote battery connection posts for jump starting. Depending on the vehicle model, remote post locations may vary.

### Non Quadrifoglio Model

Remote Jump Starting Post Locations

Remote Positive (+) Post

Remote Negative (-) Post

The remote positive (+) post is located at the rear of the engine compartment, which can be accessed by removing the cowl cover, and opening the spring loaded protective flap.

Protective Cowl Cover

Protective Flap And Remote Positive (+) Post

The remote negative (-) post is an exposed stud, positioned next to the passenger side hood lock on the upper frame rail.

Remote Negative (-) Post Location

**WARNING:**

Do not connect the jumper cable to the negative (-) post of the discharged battery. The resulting electrical spark could cause the battery to explode and could result in serious injury. Only use the specific ground point, do not use any other exposed metal parts.

To carry out the operation, you need to have the correct cables to connect to the battery of another vehicle or a portable battery booster pack to the remote posts of the discharged battery. Usually, these cables have terminals at the ends and are identified by different sheath colors (red = positive, black = negative).
