

2021 Jeep Grand Cherokee L

Preparations For Jump Start

The battery in your vehicle is located under the driver's front seat. There are remote terminals located under the hood to assist in jump starting.

Jump Starting Posts

Remote Positive (+) Post (Covered With Protective Cap)

Remote Negative (-) Post

Note: The remote battery posts are viewed by standing on the right side of the vehicle looking over the fender. The remote battery posts may be covered with protective caps. Lift up on the cap to gain access to the positive battery post. Do not jump off fuses. Only jump directly off positive post which has a positive (+) symbol on or around the post.

SEE BELOW STEPS TO PREPARE FOR JUMP STARTING:

- 1 Apply the parking brake, shift the automatic transmission into PARK (P) and turn the ignition OFF.
- 2 Turn off the heater, radio, and all electrical accessories.
- 3 If using another vehicle to jump start the battery, park the vehicle within the jumper cables' reach, apply the parking brake and make sure the ignition is OFF.

WARNING:

Do not allow vehicles to touch each other as this could establish a ground connection and personal injury could result.

Note: Be sure that the disconnected cable ends do not touch each other, or either vehicle, until properly connected for jump starting.

WARNING:

- Take care to avoid the radiator cooling fan whenever the hood is raised. It can start anytime the ignition switch is ON. You can be injured by moving fan blades.
- Remove any metal jewelry such as rings, watch bands and bracelets that could make an inadvertent electrical contact. You could be seriously injured.
- Batteries contain sulfuric acid that can burn your skin or eyes and generate hydrogen gas which is flammable and explosive. Keep open flames or sparks away from the battery.
