

2022 Jeep Grand Cherokee 4XE

Preparations for Jump Starting

Remote Positive (+) Post

Remote Negative (-) Post

Jump Starting Posts

The battery in your vehicle is located under the driver's front seat. There are remote terminals located under the hood to assist in jump starting.

Note: The remote battery posts are viewed by standing on the right side of the vehicle looking over the fender. The positive battery post may be covered with a protective cap. Lift up on the cap to gain access to the positive battery post. Do not jump off fuses. Only jump directly off positive post which has a positive (+) symbol on or around the post.

SEE THE FOLLOWING STEPS TO PREPARE FOR JUMP STARTING:

- 1 Apply the parking brake, shift the automatic transmission into PARK (P) and turn the ignition OFF.
- 2 Turn off the heater, radio, and all electrical accessories.
- 3 If using another vehicle to jump start the battery, park the vehicle within the jumper cables' reach, apply the parking brake and make sure the ignition is OFF.

Note: Be sure that the disconnected cable ends do not touch each other, or either vehicle, until properly connected for jump starting.

WARNING:

Do not allow vehicles to touch each other as this could establish a ground connection and personal injury could result.

WARNING:

- Take care to avoid the radiator cooling fan whenever the hood is raised. It can start anytime the ignition switch is ON. You can be injured by moving fan blades.
- Remove any metal jewelry such as rings, watch bands and bracelets that could make an inadvertent electrical contact. You could be seriously injured.
- Batteries contain sulfuric acid that can burn your skin or eyes and generate hydrogen gas which is flammable and explosive. Keep open flames or sparks away from the battery.
